SUMMARY

I help students build confidence in technology by making programming and data concepts accessible and engaging, and I am currently completing Pre-Service Teacher Professional Education at Universitas Pendidikan Indonesia, with hands-on experience teaching Informatics at SMA Negeri 24 Bandung. Skilled in designing Kurikulum Merdeka-aligned lesson plans and learning modules, with a strong technical foundation in Python, SQL, and data visualization tools.

EXPERIENCE

SMA Negeri 24 Bandung – Informatics Teacher (Teaching Practicum) – [Location]
In progress

- Teach Informatics to Grade X students (Phase E) under the competency-based Kurikulum Merdeka, covering programming fundamentals and computational thinking.
- Develop lesson plans and learning modules aligned with competency-based curriculum standards, including coding exercises in [Python/Scratch] and assessment rubrics.
- Deliver whole-class lessons using Google Classroom and Google Meet, and track assessment results to adjust teaching strategies.

Taman Ilmu – Volunteer Mathematics Teacher, Grades 1, 2, and 3 (Elementary) – [Location]
Sep 2025 – Feb 2026

- Taught mathematics to Grades 1-3 using hands-on activities and visual aids to build foundational numeracy skills.

STT Terpadu Nurul Fikri – Teaching Assistant, Business Intelligence – [Location]
Feb 2024 – Dec 2025

- Guided university students through data analysis and visualization concepts using Power BI and Looker Studio, supporting hands-on dashboard projects.
- Assessed student assignments using rubrics, provided feedback to improve data visualization quality, and prepared lecture slides in Google Slides.

NF Academy – Digital Marketing Mentor – [Location]
Feb 2024 – Jul 2024

- Mentored digital marketing mentees through structured learning plans, tracked progress via logbooks, and facilitated weekly knowledge-sharing sessions.

STT Terpadu Nurul Fikri – Teaching Assistant, Statistics and Computer Mathematics – [Location]
Sep 2023 – Jan 2024

- Supported Statistics and Computer Mathematics students with Python and Excel exercises, assessed assignments using grading rubrics, and prepared lecture materials.

STT Terpadu Nurul Fikri – Teaching Assistant, Statistics and Probability – [Location]
Feb 2023 – Jul 2023

- Mentored Statistics and Probability students, designed grading rubrics for problem sets, and delivered lecture sessions on statistical concepts.

Character Development Coordinating Body, STT Terpadu Nurul Fikri – Mentor – [Location]
Sep 2020 – Apr 2022

- Facilitated learning sessions and shared knowledge and experience with mentees.

Self-employed – Freelance Data Analyst – [Location]
2024 – Present

- Deliver data analysis and visualization projects for clients using Python (Py), SQL, Power BI, and Looker Studio, translating business questions into actionable dashboards.

SKILLS

Teaching: Lesson and module development (Kurikulum Merdeka), diagnostic, formative, and summative assessment, Problem-Based Learning, classroom management
Programming: Python, SQL, HTML, CSS, JavaScript, Bootstrap, Scratch, Blockly
Data Analysis and Visualization: Power BI, Looker Studio, Google Colab, Google Sheets
Learning Technology and Collaboration: Google Workspace, Canva, Notion, Trello
Design and Media: Figma, CapCut

EDUCATION

Universitas Pendidikan Indonesia – Pre-Service Teacher Professional Education (PPG Prajabatan) in Informatics – Bandung

Feb 2026 – Present

STT Terpadu Nurul Fikri – Bachelor of Information Systems (S1 Sistem Informasi) – Jakarta
Sep 2019 – Sep 2023
GPA: 3.97/4.00

PROJECTS

- Power BI and Looker Studio Learning Module: designed and delivered a hands-on study module for university students, including sample dashboards and guided exercises; materials now used in ongoing Business Intelligence courses.
- Digital Business Study Program Evaluation Dashboard: client project in Looker Studio for the Head of Study Program (±100 respondents).
- Flight Ticket Price Prediction, Algorithm Comparison: first-author scientific article comparing four machine learning models; published findings demonstrate ability to explain complex algorithms clearly—a transferable skill for teaching computational thinking in Informatics classrooms.
- Chamber of Desire: flower arrangement ordering website built with HTML, Bootstrap, and JavaScript.
- Worklance: job-search platform for students and fresh graduates (pitch deck, Figma UI/UX design, product video).
- X-Wallet (Oct 2021 – Jan 2022): digital wallet application design; System Analyst role using Agile methodology.

CERTIFICATIONS AND TRAINING

- Basic Data Visualization – Dicoding Indonesia, [2026]
- Foundation of AI and Life Skills for Gen- –, Orbit Future Academy (Kampus Merdeka), Feb – Jul 2022
- Digital Marketing Academy – NF Computer (Kampus Merdeka), Aug – Dec 2022

ORGANIZATIONS

- Deputy Chair II, Student Representative Council (DPM), STT Terpadu Nurul Fikri (May 2022 – Apr 2023)
- Secretary, Ikatan Mahasiswa Beastudi, STT Terpadu Nurul Fikri (Mar 2022 – Apr 2023)
- Head of Institutional Division III, DPM, STT Terpadu Nurul Fikri (Mar 2021 – Mar 2022)

LANGUAGES

Indonesian (native), English (intermediate), Mandarin (beginner)
